Are 400 watt solar panels a good choice?

400 watt wholesale solar panels are an interesting case. They are the middle-of-the-road choice and you can often see them both in residential and commercial installations. They often have 66/132 cells and their dimensions vary from 39 x 71 to 39 x 77 inches. The majority of home solar systems are installed on the roof.

What are the different types of solar panels?

Their efficiency today varies from 16 to 22%, which means that mono solar cells convert into direct current from 16% to 22% of the sunlight that they receive. That's the most popular type of panels -- in fact, most top manufacturers don't even sell anything else. Polycrystalline panels are usually blue in color.
