

700va inverter price

How many watts can a 700 watt inverter run?

The inverter can run a 700 wattload for 2.4 hours. Notice that we divided 31.2 amps with 75ah,not 150ah. That is because a deep cycle battery has a 50% discharge rate (DOD) so only 75ah is usable. If you have a new AGM or gel battery the DOD can reach 70%. For lithium batteries you can fully discharge it without causing damage.
