

For the ESS, the average output power at 5°C shows a 24% increase when solar irradiance increases from 400 W/m² to 1000 W/m². Conversely, at 45°C, the average output power for the ESS also increases by 13%. However, the rate of increase in the average output power at 45°C is lower than at 5°C. Energy Storage Safety for Electric Vehicles
