Where can I buy a single phase UPS system?

Here at Critical Power Supplies, we have an exceptional range of single phase UPS systems available to purchase online. The technology used to generate and distribute electricity in many countries around the world produces either a three-phase or single-phase supply.

How do I get advice on a 1 phase UPS system?

For advice on 1 phase UPS, or if you would like to know more about single phase UPS systems and the range of power protection products and services we supply, or if you would like us to arrange a site survey or quotation, please call: 0808 503 8777, fill in our contacts form or send us an email with your details and we'll call you.

What is a single phase uninterruptible power supply?

Because single phase uninterruptible power supplies are associated with equipment with a lower power requirement, it is best to use this type of system for less critical equipment. A three phase system, on the other hand, is suited to larger applications that include critical loads.

Can a single-phase UPS be hard-wired?

For additional power security, some single-phase UPS (and those rated above 3kVA) can be hard-wired, in which case we can provide expert installation and project management. We also provide battery extension packs to increase battery run time, plus bypasses, remote monitoring, power management and power monitoring solutions.

What is a three phase UPS?

As the name suggests, a three phase system uses three separate conductors which offer three sinewaves. Continuous power is supplied to the load. Although more efficient, three phase UPS tend to be suited to larger applications that require a more reliable source of backup power.

What types of ups do critical power projects supply?

At Critical Power Projects, we supply a number of desktops, floor standing, or rack-mounted, single phase UPS and single-phase UPS systems up to 3kVA from leading manufacturers across the globe.
