

Chisinau outdoor power demand trend

How will China's power demand change from 2021 to 2023?

From 2021 to 2023, China's power demand growth will gradually slow down and even show a downward trend. Accurate forecasting of social power demand is the country's primary task in making decisions on power overall planning, coal power withdrawal, and renewable energy investment.

How do we measure China's power demand?

We use the total social electricity consumption to measure China's power demand. The time-series data were obtained from the National Energy Administration and The China Electricity Council, covering 255 monthly time-series data of the whole society's electricity consumption from January 2003 to September 2021.

How does Moldova generate electricity?

The Moldovan government procures electricity directly from the plant. Renewables represent 20% of Moldova's energy mix, consisting almost fully of solid biofuels (19% in 2018). 6% of electricity generation comes from renewable sources (hydro, wind, solar PV).

How long will China's power demand last?

Third, in practice, medium and long-term power demand forecast by month. The experimental results reveal the evolution law and development trend of China's power demand in the next two years (October 2021 to September 2023).

Why is China's power demand slowing down?

It is found that the growth rate of China's power demand is slowing down or even showing a downward trend due to multiple impacts such as energy conservation and emission reduction, supply-side structural reform, and the new pneumonia epidemic, which provides a new decision-making basis for China's power system transformation path planning.

Where can I find information about Moldova's energy situation?

It provides the full picture of Moldova's energy situation in physical and energy units, and underlying energy data are easily accessible in Excel format in the energy statistics section of the website. The NBS also publishes data on electricity and gas prices, as well as monthly electricity and oil data.
