How can a DC/DC converter help in remote applications? In remote sites we often face DC only control applications. This means the DC voltage is the only available voltage and comes from a source like a battery, solar panel or DC fed from a local panel.. In addition to the voltage drop caused by the wire length, wire size and current draw, the DC voltage can also be made "dirty" ...

The growing use of 48V PDNs requires compatibility for powering legacy 12V systems and infrastructure. Conventional 1/8 and 1/4 open frame brick converters are large and bulky and do not meet the power density needs of advanced systems. In addition, conventional converter topologies have inefficiencies that can reduce the 48V distribution gains.
