

What is a PV AC combiner box?

The new PV AC Combiner boxes have been designed for PV systems with string inverters in trackers or fix tilt systems. The product portfolio is suitable for inverters from 60 kW up to 200 kW and support voltages of 400 V, 690 V or 800 V AC. The combiner boxes allow to collect from 2 up to 6 string inverters in one single cabinet.

What is a DC combiner box?

Our DC combiner boxes offer users the possibility to integrate short-circuit and overvoltage protection, as well string monitoring solutions (I, V, T and SPD and switch isolator status), for PV systems using central inverters with PV panels in trackers and fix tilt systems.

Why do you need a high current PV combiner box?

Increasing the power of PV panels with half-cut cells leads to a rise in the power per string. This requires higher rated fuses, as well as a new approach to system design. Our new designs for high current PV combiner boxes offer easy adaptation and time savings for new developments. Are you looking for the perfect solution for your project?

What is a high current combiner box?

Technologies and PV modules are being developed constantly, and they require compatible combiner boxes. Our high current combiner box contains fuses that are not restricted to 32 A and that can handle PV modules with more than 540 Wp. With our high current combiner box, you avoid risks when implementing new technologies.

Which solar modules are compatible with the Weidmuller high current combiner box?

Then contact us to discuss your requirements! The modular variants of the Weidmuller high current combiner box are designed to be perfectly compatible with high-power modules from leading manufacturers such as JinkoSolar, Longi Solar, and Trinasolar.

How are PV DC combiner boxes tested?

PV DC combiner boxes are tested according to IEC-61439-2 and are constructed on the basis of the test results as well as assembled for the specific application. This ensures that each of the requirements of the target application is fully met.

In a photovoltaic system, the modules are arranged in strings and fields depending on the type of inverter used, the total power and the technical characteristics of the modules. ABB offers a plug & play solution that accommodates overcurrent protection devices, disconnectors and surge protective devices (SPDs) in one solar combiner box.

PV Next protects the PV system against surge voltages and short circuits and also offers the option of combining strings. The various designs are done to protect all string inverters available in the European market. Find the matching combiner box for the most common inverter types below or find more variants in our combiner box product selector.

In the pursuit of enhancing solar energy system efficiency and reliability, a large-scale solar photovoltaic (PV) project in Europe integrated ONCCY Solar PV Combiner Box and MCCB (Molded Case Circuit Breaker) for advanced inverter protection. This installation underscores the importance of using high-quality components to ensure system safety and ...

PV DC COMBINER BOX is a complete range of tailor-made Level 1 combiner boxes for utility-scale photovoltaic systems. The combiner boxes are installed to join and protect the DC strings that go from the PV panels to the solar inverter. The PV DC COMBINER BOX product range offers solutions from 8 to 32 inputs and 1 or 2 outputs. These can
