

Georgetown inverter prices

How much does a solar inverter cost?

For an average-sized installation, inverters typically range between \$1000 and \$1500. That cost can go up quickly though as the installation gets bigger. Each year, the National Renewable Energy Lab performs a cost benchmark of the solar industry, looking at average installation costs, inverter and panel costs, and a host of other related topics.

Which inverter is installed in my home?

Which inverter is installed in your home is typically decided by availability and installation size as well as placement of your solar installation (see the article linked above for more information on this).

What is inverter efficiency?

Inverter efficiency is a measure of how much of the direct current electricity that goes into the inverter can be converted to alternating current to be used in the home or in the utility grid. Modern inverters are ultra-efficient - both the ABB and SMA inverters above are about 97% efficient.

Choices are a recreational inverter (up to 2000 watts), a midsized inverter (up to 3500 watts), a larger inverter (up to 7500 watts) or portable or a home standby (up to 20000 ...
