

Grenada Solar Air Conditioning

Solar panels can be used to generate the electricity needed to run an air conditioner, and because solar panels produce renewable energy, there are no emissions from this process. Additionally, solar power can be generated even when the sun is not shining, making it a reliable source of power for air conditioning.

Being the only air conditioning industry in Grenada with a duct fabrication shop at our building location, our experienced craftsmen work closely with our customers to understand their needs and achieve their goals. We provide engineering support, outstanding customer service, and consistent product quality and on-time delivery of your valuable ...
