

High power UPS uninterruptible power supply in Manchester UK

What types of uninterruptible power supplies do you supply?

We supply a full range of uninterruptible power supplies including: Offline, Line Interactive, Online Double Conversion and Power Conditioned UPS. From a small 300va to a 800Kva UPS running in parallel we have the expertise to provide the solution you require. The design, supply, installation and maintenance of your UPS system is our speciality.

Should you install an uninterruptible power supply?

Installing an uninterruptible power supply is an excellent way to protect your mission critical systems. However, it is no guarantee of continual power as UPS components and UPS batteries can fail if they are not properly maintained to a high standard.

Can an ups fully deplete a battery?

Yes, a UPS like any other equipment powered from a battery can fully deplete. This will all depend on how much back up time the UPS has and how long the power cut is. We stock a range of Uninterruptible Power Supplies (UPS), that are ready to be delivered, installed and maintained.

How does a UPS system work?

A UPS system is a backup power solution that uses energy stored in a set of batteries to power the inverter section when the mains power supply section. The inverter converts the DC (direct current) power from the battery set into a digitally generated AC (alternating current) waveform.

What is critical power supplies?

At Critical Power Supplies, Uninterruptible Power Supplies (UPS) are our speciality. With over 30 years of experience, we offer a comprehensive range of UPS systems tailored to meet the demands of various business environments, from small offices to large industrial operations.

Does ups need maintenance?

However, it is no guarantee of continual power as UPS components and UPS batteries can fail if they are not properly maintained to a high standard. A planned program of UPS maintenance should always be considered as an essential part of any standby power protection system.
