What is a lead acid battery?

These batteries are commonly used in vehicles, boats, and uninterruptible power supplies (UPS) to keep devices running smoothly during blackouts or emergencies. Ivent stocks a wide range of gel, AGM, VRLA and flooded batteries. These batteries are also referred to as acid batteries or simply lead batteries. But how does a lead acid battery work?

Can a sealed lead acid battery be discharged?

Sealed lead acid batteries should never be discharged below 1.75v per cell or stored in a discharge state, doing so could irreversibly damage the battery. Mr Positive is NZ premier retailer of Sealed Lead Acid batteries (SLA Battery). Buy sealed lead acid batteries with the confidence that the advice you are getting is from experts!

Are lead acid batteries a good source of power?

When it comes to power, lead acid batteries are the trusted source for automotive and industrial applications. They have been the go-to energy source for decades, providing reliable power in a variety of applications.

How long does it take to ship a lead acid battery?

Mr Positive uses registered specialised hazard couriers to ship certain lead acid batteries around NZ. Shipping of this product range requires extreme care. Generally items are shipped the same day an order payment is confirmed. Due to the nature of the product and volatile chemicals, the transit time may take 2-5 days depending on your location.
