Do lithium batteries have BMS?

While some lithium batteries can be completely discharged and damaged, BMS (Battery Management System) circuitry now prevents this by shutting down the battery before it reaches a critical power drain level. Unfortunately, not all lithium powersports batteries have BMS.

What is a lithium battery management system (BMS)?

Many people are familiar with a Battery Management System (BMS), which should be installed with every lithium battery. A BMS monitors the voltages of the individual lithium cells inside a battery and has the ability to shut everything down in an emergency. A BBMS, on the other hand, regulates the charging of the lithium batteries.
