

Mobile rechargeable power box

What can a portable power station charge?

A portable power station can charge and power a variety of devices, from small electronics like smartphones, tablets, laptops, and cameras to larger appliances such as mini-fridges, TVs, and even power tools.

How long does a portable power station take to recharge?

That depends on the capacity of your portable power station, the wattage of your solar panels, and the weather. For example, a 1,000Wh power station that's receiving a consistent stream of 200 watts of power from a solar panel would take about 5 hours to recharge ($1,000/200=5$). Are portable power stations weather resistant?

Can a portable power station charge a car?

Higher capacity units will also let you power appliances and charge electric vehicles. Check which ports your preferred model has, including USB Type-A and Type-C, AC and mains sockets. How long can you run a portable power station? It all depends on the power station and the device or devices you're charging.

How do portable power stations work?

Portable power stations have control panels with LED displays and buttons that turn off and on inputs and display usage and remaining power. Most portable power stations are also compatible with Bluetooth and Wi-Fi, allowing you to monitor and control them remotely from a smartphone app.

Are portable power stations suitable for camping?

Almost all compact portable power stations will be suitable for camping, but I rather like the Bluetti Handsfree 2 for this role - mostly because many of them are big, boxy, unwieldy units that take up a fair amount of space.

How much power can a portable power station hold?

While a particular power station might claim to hold 1,000 watt hours, the actual amount of usable power you can get out of it is a different story. The best portable power stations also have an onboard computer that shows you how much energy is left in your unit, as well as how much power it's currently using.

In order to find the best power bank for your devices, consider the type of charging you will be doing. There are many different charging interfaces, including wireless portable phone chargers and USB-C power pack chargers. B ports can charge a wide variety of devices across brands, but it is always a good idea to check compatibility before buying.

EcoFlow's mid-range portable power station, the River 2 Max, is our favourite model overall. It has a two-tone colour scheme, and its handle has now been moved to the back so items can be stacked ...
