Two unique features of a module having half-cells are the half-size of the cells and the series-parallel-series (SPS) design (Xu et al., 2021, Qian et al., May 2018). Due to their SPS configuration of cells, half-cell modules are more tolerant towards shading (Waqar Akram, 2020). Since half-cut cells have half the current flow, the heat generation is decreased, and ...
