

Ottawa announces energy storage project

Does Ottawa have a battery energy storage system?

A battery energy storage system. (Photo by City of Ottawa.) Posted Jan 24,2025 01:47:28 PM. Last Updated Jan 24,2025 02:57:01 PM. Changes have been made to the city's Official Plan and zoning bylaws to create a building for storing electricity in off-peak hours from the grid.

Who owns the energy supply in Ottawa?

While the Province is the regulator and owner of electricity generation supplies, municipalities have siting authority over new proposed renewable energy generation and storage projects, such as BESS. The amendments approved today would set policy direction for siting BESS within Ottawa's rural and urban areas.

Should battery storage facilities be required in Ottawa?

Ottawa's city council approved guidelines last month that would require companies wanting to build battery storage facilities to prove to Ottawa Fire Services that fire and risk management has been included in any proposal. It will also be required to install fire prevention and suppression systems.

What is the largest energy storage procurement in Canada?

This represented the largest energy storage procurement ever in Canada. A report was tabled at the November 30, 2023 Agricultural and Rural Affairs Committee on four proposed BESS projects within Ottawa, one of which project received Council support, known as a Municipal Support Resolution (MSR).

Who approves energy storage systems in Ontario?

The primary authority for the Installation and Approval of Energy Storage Systems connected to the electrical grid in Ontario is the Electrical Safety Authority (ESA). The ESA administers Part VIII of the Electricity Act and oversees the Ontario Electrical Safety Code (OESC).

Is there a Bess project in West Ottawa?

Yes, there are two transmission scale BESS projects proposed in rural west Ottawa. One in West Carleton-March (Ward 5) and the other is in Rideau-Jock (Ward 21). Are there land use impacts associated with BESS? There are different types and sizes of BESS.

January 14, 2025 In October 2023, the Independent Electricity Systems Operator (IESO) put out a call for proposals for new Battery Energy Storage Systems (BESS). Through this competitive procurement process, known as the Long-term 1 Request for Proposals (LT1 RFP), the province looked to procure year-round capacity from new build storage facilities larger than 1 MW. This ...

DUBAI - 1 December 2023 - Today, at COP28, Energy Dome has announced funding commitments for its first CO2-based and innovative thermo-mechanical energy storage system to be located in Sardinia, Italy.

Ottawa announces energy storage project

Funding will be in the ...

The 20-MW facility was the company's first energy storage project connected to Alberta's electricity grid in late 2020. (Submitted by Enfinite) This support is not approval, staff emphasized.

MEAFORD -- The Ontario government is advancing pre-development work for the proposed Ontario Pumped Storage Project, developed in partnership by TC Energy (TCE) and the Saugeen Ojibway Nation. The project, which would be the largest of its kind in Canada, would provide up to 1,000 megawatts of clean, affordable, and reliable electricity storage - enough to ...

the Tilbury Battery Storage Project, an 80 megawatt, four-hour duration battery storage project in the Municipality of Lakeshore. The projects are expected to be in service by 2026 and will join the already-announced 250-megawatt Oneida Energy Storage facility that is scheduled to be in service in 2025. Ontario currently has 228 megawatts of ...
