

Power tool battery 21700 lithium battery

What is a 21700 battery used for?

21700 batteries are also used in power tools and other devices that require a high level of power. This is because they can provide the high levels of power required by these devices. 21700 has a higher energy density than 18650. This means that their rechargeable lithium-ion cells can store more energy resulting in a much smaller battery pack.

What is a 21700 lithium-ion battery?

A 21700 lithium-ion battery is the next generation of batteries, powering the mainstream electric vehicles that cruise the road today. Farina uses a genuine LG 21700 cell, resulting in more sustainable and reliable runtime than a typical 18650 battery.

What is the highest capacity of a 21700 battery?

21700 cells start around 3.0Ah (3000mAh) and go up to 4.0Ah (4000mAh) for power tool batteries. It's why we see compact (1P) packs that have 3Ah or 4Ah designations all the way up to 12Ah (3P) big boys.

What are the advantages of using a 21700 battery?

The 21700 battery type is popular in rechargeable and high current draining devices considering its higher degree of capabilities like 1000+ charge cycle and higher energy density. When compared to AA size and 18650 type cells, their height and diameter both are larger. They are not replacements for AA or AAA or 18650 size cells.

What are the dimensions of a 21700 battery?

The 21700 battery has an approximate length of 70mm and an approximate diameter of 21mm. However, there can be some tolerance in length and diameter, so you might find specifications written as (say) 21 ± 0.41mm ? 70 ± 0.25mm on the datasheet.

Are 18650 batteries suitable for power tools?

Batteries using 18650 cells for power tools typically range from 1.5Ah to 3.0Ah in each cell. Most manufacturers use 2.5Ah cells at the top end, as higher capacities like 3.0Ah have reported issues.
