

Price of energy storage vehicle in Surabaya Indonesia

Why is the EV market still in development in Indonesia?

The electric vehicle (EV) market in Indonesia is still at an early stage in its development, in part because the high cost of EVs deters potential buyers. While purchase price is often cited as a key obstacle to EV adoption, it is only one of many cost items that consumers consider in a vehicle purchase.

Will Indonesia provide subsidies to buy electric cars?

Indonesia plans to provide subsidies to buy electric vehicles starting next year. The government targets to have 2.5 million electric car or electronic vehicle (EV) users by 2025.

How long do electric vehicles last in Indonesia?

An assumed annual mileage of 9,000 miles per year and an eight-year ownership period from 2022 to 2030. This is because the estimated average age of electric vehicle batteries in Indonesia is 8 years. The specifications and cost of all vehicles examined in this work are stated in Table 1.

Should Indonesia switch to electric cars?

Indonesia recognises switching to electric vehicles as an efficient strategy to reduce emissions. EVs are way more efficient in energy use than internal-combustion engine cars (60-75% compared to just 12-30%). Furthermore, the life-cycle emissions of EVs are lower, even with coal-dominant power grids.

How many electric cars are there in Indonesia?

Early stages. It is estimated that out of the 125 million motorcycles in Indonesia's road fleet at the end of 2022, only 32,000 are electric.⁸ In terms of car sales, only 1,647 battery electric cars were s
