

Roman Solar Panels

Did ancient Roman ruins have solar panels?

Link Copied! Editor's Note: This article was originally published by The Art Newspaper, an editorial partner of CNN Style. Ancient Roman ruins at Pompeii have been fitted with invisible solar panels, in a move that will contribute to the archaeological site's sustainability efforts and cut costs.

Can solar panels be installed in Pompeii?

The Ancient Roman town of Pompeii is serving as the site of a pilot project, which includes the installation of custom-made PV solar panels. The latter are indistinguishable from traditional terracotta.

Are Pompeii's solar panels terracotta bricks?

Pompeii receives over 3.5 million tourists each year from all over the world that come to admire the ruins left by the eruption of the Vesuvius that, in 79 AD, engulfed the city. None of them, however, are likely to notice the solar panels disguised as ancient Roman tiles or terracotta bricks.

Are solar panels a sustainable solution?

None of them, however, are likely to notice the solar panels disguised as ancient Roman tiles or terracotta bricks. These are sustainable solutions adopted by the archaeological park of Pompeii and the Portuguese city of Evora to embrace eco-friendly developments.

Who invented photovoltaic panels?

They were developed and patented by the family business Dyaqua. "It is me, my father, my mother, and my brother," said Elisabetta Quagliato. "Since photovoltaic production is increasing, we are expanding and now have two employees."

Can solar panels help reduce energy bills?

The new technology will help the archaeological site to cut energy bills and make it more enjoyable, he added. The installed solar panels take the appearance of terracotta tiles. The invisible solar panels -- or "traditional PV tiles" as they are technically known -- were created by the Italian company Dyaqua.
