

Uninterruptible power supply 15k

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS), with a 1kVA/600W capacity and line interactive design, provides battery backup for computers, servers, and office networks. It has a 220V/120V AC output voltage and is brand new, high quality, and inexpensive.

How do I choose the best uninterruptible power supply?

When selecting an uninterruptible power supply (UPS), the power it should have is an important consideration, depending on its intended use. In addition to the bridging time, the minimum power is a crucial factor. The system must be able to bridge power disturbances until the emergency generator takes over.

What SNMP/Webcard does a 15kva 20kva ups have?

The 15kVA-20kVA UPS models include pre-installed Vertiv(TM) RDU101 SNMP/Webcard, a network management card with security and remote management capabilities that makes systems easy to deploy and simple to manage.
