In June 2024, Indonesia issued rooftop solar PV system development quotas for state electricity company PLN between 2024 and 2028, aiming to add 5.75GW of capacity in the country.

Solar panels are built to work in all climates, but in some cases, rooftops may not be suitable for solar systems due to age or tree cover. If there are trees near your home that create excessive shade on your roof, rooftop panels may not be the most ideal option. The size, shape, and slope of your roof are also important factors to consider.

One system: The SOLROOF system consists of integrated FIT VOLT photovoltaic panels, FIT modular roof panels, optimisers and SolarEdge system components. One assembly: Thanks to the modularity of FIT VOLT and FIT panels, the installation is quick and carried out by authorised roofers. One warranty: The roof is covered by a single manufacturer's warranty.
