

What is Poland's energy storage subsidy program?

From ESS News Following a public consultation launched in July 2024, the Polish Ministry of Climate and Environment has finalized its energy storage subsidy program which aims to support the deployment of more than 5 GWh of energy storage in the country. The new regulation was published in the Journal of Laws of the Republic of Poland on March 7.

Will Poland support new electricity storage facilities in 2024?

In an announcement released on October 3, 2024, the executive arm of the European Union said that the Polish scheme will support the installation of at least 5.4 GWh of new electricity storage facilities. The policy will support only newly installed storage facilities with a capacity of at least 4 MWh.

Does Poland need a state aid package for energy storage?

A panel discussion on the Polish market at the recent Energy Storage Summit CEE in Warsaw. Image: Solar Media The European Commission (EC) has approved a EUR1.2 billion (US\$1.32 billion) state aid package for Poland to support the deployment of electricity storage facilities.

Which storage facilities will be supported by Poland's energy policy?

The policy will support only newly installed storage facilities with a capacity of at least 4 MWh. Eligible projects will be connected to Poland's electricity distribution or transmission networks at all voltage levels.

How much PLN will be distributed under the energy subsidy scheme?

A total of PLN 4 billion (\$1 billion) will be distributed under the subsidy scheme by the end of 2025 in a bid to bring online more than 5 GWh of energy storage projects by 2028. From ESS News

When will the new water subsidy scheme start in Poland?

The new regulation was published in the Journal of Laws of the Republic of Poland on March 7. It paves the way for the National Fund for Environmental Protection and Water Management to launch the much-awaited subsidy scheme at the end of Q1 or the beginning of Q2 2025.

According to amendments to the Renewable Energy Act, PV owners can choose between monthly or hourly settlement rates. The hourly option offers higher returns for unused energy, increasing from 20% to 30%. Additionally, the amended act streamlines the investment process for renewable energy sources (RES), shortening approval timelines for PV ...

Poland's National Fund for Environmental Protection and Water Management has opened applications for the sixth edition of its Mój Prąd (My Electricity) rebate scheme. Net-billing prosumers who incurred installation expenses after Jan 1, 2021, are eligible. The maximum subsidy available for solar without storage

is PLN 6,000, increasing to PLN 7,000 for solar ...

The Trzebinia project represented the lion's share of battery energy storage secured in Poland's seventh capacity market auction, which catalyzed a mere 165 MW and mainly generated subsidies for existing and new coal and gas-fired power plants. The nation's eighth auction, held in 2023, was the first one to secure a large amount of ...
