We also looked at UPS units of different budgets to ensure anyone can afford a quality UPS. What to Look For . When buying a UPS unit, look for one with enough outlets for all the devices you want to connect. The best models should also have the capacity to power at least the most important electronics for several minutes if the power goes out.

Actually 255V input is less of a problem than 190V because the PSU only uses what it can get. With lower voltage the amperage in the PFC stage increases, thus the stress also. With higher Voltage, the Amperage decreases, thus less stress -> better. And some PSU are even specified for up to 264V Input...
